PROFILE SUMMARY

Full Stack Software Engineer with experience in **Generative AI, Agentic AI, RAG, and LLM-powered applications**. Skilled in building scalable, production-ready solutions and integrating AI capabilities into real-world applications.

EDUCATION

Vellore Institute of Technology, Chennai

July 2021 – Sept. 2025

B.Tech in Computer Science and Technology

SKILLS

Languages: C#, C/C++, Python, SQL, TypeScript, JavaScript, HTML/CSS

AI & GenAI: Agentic AI, Generative AI, RAG, Advanced RAG, LangGraph, LLMs, Prompt Engineering

Frameworks: ASP.NET Core, .NET 8, Angular, Vue.js

Cloud & Tools: AWS, Azure, Docker, Kubernetes, Git, GitHub

EXPERIENCE

Capgemini | *Software Engineer*

Sept. 2025 – Present

TOAS – Consent Management Tool (CMT)

- Developing a full-stack platform for centralized **customer consent and contract configuration** across multiple markets using **Angular, TypeScript, ASP.NET Core, and .NET**.
- Built self-service workflows enabling markets to independently manage consent configurations, improving **efficiency and turnaround time**.

Uchaar AI (*Internal GenAI Project*)

- Developed a **GenAI multilingual voice translation assistant** supporting **12 languages** using **ASP.NET Core (.NET 8) and Angular 17**.
- Integrated **ChatGPT-4o** with fallback mechanisms and real-time speech processing for reliable cross-browser translation.

PROJECTS

SkillVault — Autonomous AI Agent Capability Vault | *FastAPI, LangGraph, Next.js 15, Python*

- Architected an autonomous agent engine using **LangGraph** to dynamically retrieve, execute, and synthesize Python capabilities, reducing **LLM API token costs by 84%**.
- Engineered hybrid vector reranking using similarity, execution success, and risk scoring for **sub-50ms capability retrieval**.

Skin Cancer Detection | *Python, Deep Learning, CNN*

Feb. 2025

- Developed a hybrid stacked ensemble using **DenseNet121 + InceptionV3**, achieving **97.08% accuracy** in skin lesion classification.
- Applied CNN-based feature extraction using **MobileNetV2, InceptionV3, DenseNet121, and ResNet**.
